Trying to produce everything yourself would mean you are using your time and resources to produce many things ① for which you are a high-cost provider. This would translate into lower production and income. For example, even though most doctors might be good at record keeping and arranging appointments, it is generally in their interest to hire someone to perform these services. The time doctors use to keep records is time they could have spent seeing patients. Because the time ② spent with their patients is worth a lot, the opportunity cost of record keeping for doctors will be high. Thus, doctors will almost always find it ③ advantageous to hire someone else to keep and manage their records. Moreover, when the doctor specializes in the provision of physician services and ④ hiring someone who has a comparative advantage in record keeping, costs will be lower and joint output larger than ⑤ would otherwise be achievable.

** opportunity cost: 기회비용 ** comparative advantage: 비교 우위*

Commercial airplanes generally travel airways similar to roads, although they are not physical structures. Airways have fixed widths and defined altitudes, ⓐ which separate traffic moving in opposite directions. Vertical separation of aircraft allows some flights ⓑ passing over airports while other processes occur below. Air travel usually covers long distances, with short periods of intense pilot activity at takeoff and landing and long periods of lower pilot activity while in the air, the portion of the flight ⓒ known as the "long haul." During the long-haul portion of a flight, pilots spend more time assessing aircraft status than ⓓ searching out nearby planes. This is because collisions between aircraft usually occur in the surrounding area of airports, while crashes due to aircraft malfunction ⓔ tends to occur during long-haul flight.

** altitude: 고도 ** long haul: 장거리 비행 *** malfunction: 오작동*

① ⓑ, ⓔ ② ⓐ, ⓑ, ⓔ ③ ⓒ, ⓓ ④ ⓐ, ⓒ, ⓓ ⑤ ⓒ, ⓔ

어휘 · 기본 19년 11월 고2 30번

A story is only as believable as the storyteller. For story to be effective, trust must be established. Yes, trust. Whenever someone stops to listen to you, an element of unspoken trust ① exists. Your listener unconsciously trusts you to say something ② worthwhile to him, something that will not waste his time. The few minutes of attention he is giving you is ③ sacrificial. He could choose to spend his time elsewhere, yet he has stopped to respect your part in a conversation. This is where story comes in. Because a story illustrates points clearly and often ④ bridges topics easily, trust can be established quickly, and recognizing this time element to story is essential to trust. ⑤ Wasting your listener's time is the capital letter at the beginning of your sentence—it leads the conversation into a sentence worth listening to if trust is earned and not taken for granted.

** sacrificial: 희생적인 ** take ~ for granted: ~을 당연하게 여기다*

Sudden success or winnings can be very dangerous. Neurologically, chemicals are released in the brain that give a powerful burst of excitement and energy, leading to the desire to ⓐ repeat this experience. It can be the start of any kind of addiction or manic behavior. Also, when gains come quickly we tend to ⓑ lose sight of the basic wisdom that true success, to really last, must come through hard work. We do not take into account the role that luck plays in such ⓒ hard-earned gains. We try again and again to recapture that high from winning so much money or attention. We acquire feelings of ⓓ superiority. We become especially ⓔ receptive to anyone who tries to warn us—they don't understand, we tell ourselves. Because this cannot be sustained, we experience an inevitable ⓕ fall, which is all the more painful, leading to the depression part of the cycle. Although gamblers are the most prone to this, it equally applies to businesspeople during bubbles and to people who gain sudden attention from the public.

** manic: 조증의 ** prone to: ~하기 쉬운*

① ⓐ, ⓒ, ⓔ ② ⓒ, ⓔ ③ ⓑ, ⓓ, ⓕ ④ ⓐ, ⓑ, ⓓ ⑤ ⓒ, ⓓ, ⓔ

Once we own something, we're far more likely to _____ it. In a study conducted at Duke University, students who won basketball tickets in an extremely onerous lottery (one that they had to wait in line to enter for more than a day) said they wouldn't sell their tickets for less than, on average, $2,400. But students who had waited and hadn't won said they would only pay, on average, $170 per ticket. Once a student owned the tickets, he or she saw them as being worth much more in the market than they were. In another example, during the housing market crash of 2008, a real estate website conducted a survey to see how homeowners felt the crash affected the price of their homes. 92% of respondents, aware of nearby foreclosures, asserted these had hurt the price of homes in their neighborhood. However, when asked about the price of their own home, 62% believed it had increased.

** onerous: 성가신 ** foreclosure: 압류*

① distrust
② neglect
③ overvalue
④ underestimate
⑤ replace

Translating academic language into everyday language can be an essential tool for you as a writer to _____. For, as writing theorists often note, writing is generally not a process in which we start with a fully formed idea in our heads that we then simply transcribe in an unchanged state onto the page. On the contrary, writing is more often a means of discovery in which we use the writing process to figure out what our idea is. This is why writers are often surprised to find that what they end up with on the page is quite different from what they thought it would be when they started. What we are trying to say here is that everyday language is often crucial for this discovery process. Translating your ideas into more common, simpler terms can help you figure out what your ideas really are, as opposed to what you initially imagined they were.

** transcribe: 옮겨 쓰다*

① reach readers outside your field
② see your own thinking more clearly
③ avoid the small errors common in academic prose
④ shorten the time you spend on revising
⑤ stay loyal to your plan

> In some cases, their brains had ceased to function altogether.

Of all the medical achievements of the 1960s, the most widely known was the first heart transplant, performed by the South African surgeon Christiaan Barnard in 1967. (①) The patient's death 18 days later did not weaken the spirits of those who welcomed a new era of medicine. (②) The ability to perform heart transplants was linked to the development of respirators, which had been introduced to hospitals in the 1950s. (③) Respirators could save many lives, but not all those whose hearts kept beating ever recovered any other significant functions. (④) The realization that such patients could be a source of organs for transplantation led to the setting up of the Harvard Brain Death Committee, and to its recommendation that the absence of all "discernible central nervous system activity" should be "a new criterion for death". (⑤) The recommendation has since been adopted, with some modifications, almost everywhere.

** respirator: 인공호흡기 ** discernible: 식별 가능한 *** criterion: 기준*

> The invention of the mechanical clock was influenced by monks who lived in monasteries that were the examples of order and routine.

(A) People started to follow the mechanical time of clocks rather than their natural body time. They ate at meal time, rather than when they were hungry, and went to bed when it was time, rather than when they were sleepy. Even periodicals and fashions became "yearly." The world had become orderly.

(B) Time was determined by watching the length of the weighted rope. The discovery of the pendulum in the seventeenth century led to the widespread use of clocks and enormous public clocks. Eventually, keeping time turned into serving time.

(C) They had to keep accurate time so that monastery bells could be rung at regular intervals to announce the seven hours of the day reserved for prayer. Early clocks were nothing more than a weight tied to a rope wrapped around a revolving drum.

** monastery: 수도원 ** pendulum: 흔들리는 추 *** periodical: 정기 간행물*

① (A)-(C)-(B) ② (B)-(A)-(C) ③ (B)-(C)-(A)
④ (C)-(A)-(B) ⑤ (C)-(B)-(A)

Many inventions were invented thousands of years ago so it can be difficult to know their exact origins. Sometimes scientists discover a model of an early invention and from this model they can accurately tell us how old it is and where it came from. However, there is always the possibility that in the future other scientists will discover an even older model of the same invention in a different part of the world. In fact, we are forever discovering the history of ancient inventions. An example of this is the invention of pottery. For many years archaeologists believed that pottery was first invented in the Near East (around modern Iran) where they had found pots dating back to 9,000 B.C. In the 1960s, however, older pots from 10,000 B.C. were found on Honshu Island, Japan. There is always a possibility that in the future archaeologists will find even older pots somewhere else.

대의 · 심화 19년 6월 고2 23번

In this world, being smart or competent isn't enough. People sometimes don't recognize talent when they see it. Their vision is clouded by the first impression we give and that can lose us the job we want, or the relationship we want. The way we present ourselves can speak more eloquently of the skills we bring to the table, if we actively cultivate that presentation. Nobody likes to be crossed off the list before being given the opportunity to show others who they are. Being able to tell your story from the moment you meet other people is a skill that must be actively cultivated, in order to send the message that you're someone to be considered and the right person for the position. For that reason, it's important that we all learn how to say the appropriate things in the right way and to present ourselves in a way that appeals to other people—tailoring a great first impression.

** eloquently: 설득력 있게 ** tailor: 맞추다*

① dangers of judging people by first impressions
② techniques for telling a story that wins an audience
③ importance of actively shaping how you present yourself
④ why real talent matters more than appearance in the long run
⑤ reasons people overlook their own talent

11 Cleveland Amory에 관한 다음 글의 내용과 일치하지 않는 것은? [6점]

일치 · 함축 · 기본 19년 9월 고2 26번

Born in 1917, Cleveland Amory was an author, an animal advocate, and an animal rescuer. During his childhood, he had a great affection for his aunt Lucy, who was instrumental in helping Amory get his first puppy as a child, an event that Amory remembered seventy years later as the most memorable moment of his childhood. He graduated from Harvard College in 1939 and later became the youngest editor ever hired by The Saturday Evening Post. Amory wrote three instant bestselling books, including The Best Cat Ever, based on his love of animals. He founded The Fund for Animals in 1967, and he served as its president, without pay, until his death in 1998. He always dreamed of a place where animals could roam free and live in caring conditions. Inspired by Anna Sewell's novel Black Beauty, Amory established Black Beauty Ranch, a 1,460-acre area that shelters various abused animals including chimpanzees and elephants. Today, a stone monument to Amory stands at Black Beauty Ranch.

** advocate: 옹호자 ** instrumental: 중요한 역할을 하는*

① 어린 시절 Lucy의 도움으로 첫 강아지를 갖게 되었다.
② Harvard 대학을 졸업한 뒤 The Saturday Evening Post의 최연소 편집자가 되었다.
③ 1967년에 The Fund for Animals를 세우고 보수를 받으며 회장을 지냈다.
④ Anna Sewell의 소설에서 영감을 받아 Black Beauty Ranch를 세웠다.
⑤ 오늘날 Black Beauty Ranch에는 그의 기념비가 서 있다.

12 밑줄 친 delete "perfect" and insert "complete"가 의미하는 바로 가장 적절한 것은? [8점]

일치 · 함축 · 심화 19년 6월 고2 22번

You can be perfect, but you need to change the way you think about it. Perfection actually is possible if you delete "perfect" and insert "complete". Imagine a basketball player taking a fifteen-foot shot and the ball going through the net, never touching the rim. Someone is likely to exclaim, "That was a perfect shot!" And it was perfect. The scoreboard reflects an increase of two points. Now again imagine that same player a few minutes later taking another fifteen-foot shot. But this time the ball hits one side of the rim, rolls around and stands still for half a second, and it finally falls through the net. An announcer might comment on what an ugly shot that was, and she would be right. But basketball games are not won on such criteria as pretty or ugly. In this instance the ball went through the net and the scoreboard increased by two points. In that sense, the second shot was as perfect as the first.

** rim: (농구 골대의) 테두리 ** criterion: 기준(복수 criteria)*

① treat flawless form as the only standard of success
② judge a result by whether it got the job done
③ finish every task before looking for perfection
④ accept that nobody can reach true perfection
⑤ focus on how a performance looks rather than on its result

13 **다음 글의 밑줄 친 ⓐ~ⓔ 중 어법상 틀린 것 3개를 찾아 기호를 쓰고, 바르게 고치시오.** [6점]

서답 · 기본 19년 11월 고2 29번

There is a reason why so many of us are attracted to recorded music these days, especially considering personal music players are common and people are listening to music through headphones a lot. Recording engineers and musicians have learned to create special effects that ⓐ tickles our brains by exploiting neural circuits that evolved to discern important features of our auditory environment. These special effects are similar in principle to 3-D art, motion pictures, or visual illusions, none of ⓑ which have been around long enough for our brains to have evolved special mechanisms to perceive them. Rather, 3-D art, motion pictures, and visual illusions leverage perceptual systems that ⓒ is in place to accomplish other things. Because they use these neural circuits in novel ways, we find them especially ⓓ interested. The same is true of the way ⓔ that modern recordings are made.

** auditory: 청각의 ** leverage: 이용하다*

기호	틀린 표현	고친 표현

14 **다음 글의 요지를 〈보기〉의 낱말을 모두 사용하여 〈조건〉에 맞게 한 문장으로 쓰시오.** [10점]

서답 · 심화 20년 6월 고2 22번

Personal blind spots are areas that are visible to others but not to you. The developmental challenge of blind spots is that you don't know what you don't know. Like that area in the side mirror of your car where you can't see that truck in the lane next to you, personal blind spots can easily be overlooked because you are completely unaware of their presence. They can be equally dangerous as well. That truck you don't see? It's really there! So are your blind spots. Just because you don't see them, doesn't mean they can't run you over. This is where you need to enlist the help of others. You have to develop a crew of special people, people who are willing to hold up that mirror, who not only know you well enough to see that truck, but who also care enough about you to let you know that it's there.

** enlist: (도움을) 구하다 ** run over: (차로) 치다*

〈보기〉
need / people / care / enough / about / you / point out / blind spots

〈조건〉
1. 〈보기〉의 낱말을 모두 사용할 것(필요하면 어형을 바꾸거나 더 쓸 수 있음)
2. 관계대명사 who와 enough + to부정사 구조를 사용할 것
3. 12~14낱말로 쓸 것

당신에게는 당신의 맹점을 짚어 줄 만큼 당신을 아끼는 사람들이 필요하다.
